

DATCHE DEDAN

BUSINESS DATA ANALYST

dedand418@gmail.com | +254 708 695 058 | Nairobi, Kenya | <https://datche-dedan.onrender.com>

PROFESSIONAL SUMMARY

I'm a data analyst who builds dashboards and visual stories that help businesses understand their performance, spot hidden patterns, and act faster. My work spans retail, FMCG and e-commerce; turning raw spreadsheets into decisions.

CORE SKILLS

Data Analysis & Visualization	Data cleaning, Exploratory Data Analysis, KPI monitoring, trend analysis, dashboards and reporting.
Statistical Analysis	Descriptive statistics, correlation analysis and hypothesis testing
Business Intelligence & Analytics	Delivering data-driven solutions through sales, FMCG, and retail analytics for decision support
Soft Skills	Analytical thinking, problem-solving, communication, attention to detail, and business acumen.

PROJECTS

Cookies Sales Tracker: *To support data-driven decisions by linking cookie order fulfilment customer contribution and geographic sales performance into a unified analytics view.*

- Delivered an integrated dashboard linking orders, shipments, and revenue for end-to-end tracking.
- Identified high-value customers and top-performing markets, supporting data-driven decision-making.

Biscuit Sales Dashboard: *To provide a structured view of biscuit sales performance across cities, time periods, and customer segments.*

- Delivered an interactive dashboard integrating revenue, profit, expenses, and quantity metrics for performance monitoring.
- Revealed key insights on top-performing cities, brands, and customer segments to support business decisions.

Sales Volume 2021-2022: *To analyze sales volume trends to understand demand patterns across products, time periods, and regions.*

- Revealed sales volatility across time, supporting better demand understanding and planning.
- Identified top-performing products and regional disparities, highlighting opportunities for growth and optimization.

Sales and Profit Report: *To consolidate sales, profit, and quantity data into a single view for unified performance monitoring.*

- Delivered an interactive dashboard integrating sales, profit, and quantity metrics for centralized business analysis and also identified top-performing products, customers, and categories, supporting strategic decision-making and resource allocation.
