Data Visualization	Dashboard development, business reporting, data storytelling, and performance monitoring.
Statistical Analysis	Descriptive statistics, correlation analysis, hypothesis testing, and data-driven decision support.
Data Management	Data transformation, validation, ETL processes, database management, and large dataset handling.
Business Analysis	Stakeholder Requirements Elicitation, Process Improvement, Solution Design & Evaluation, UAT Leadership, Operational Risk Identification & Mitigation
Soft Skills	Analytical thinking, problem-solving, communication, attention to detail, and business acumen.

CAREER PROJECTS

Business Analyst: Cookies Sales Tracker

Nairobi, Kenya. | Nov 2025 - Jan 2026

Supporting data-driven decisions by linking cookie order fulfilment customer contribution and geographic sales performance into a unified analytics view.

- Developed a Power BI sales and fulfillment dashboard integrating order, shipment, and revenue data, enabling real-time tracking of customer and regional performance across key markets.
- Built customer and revenue analytics model, identifying high-value clients driving majority of revenue and optimizing segmentation for commercial focus.
- Designed shipment performance tracking system, revealing demand fluctuations and improving operational visibility across the order lifecycle.
- Delivered geographic performance analysis, highlighting top-performing markets (led by U.S.) and supporting regional sales strategy refinement.
- Established data validation and reconciliation framework, ensuring consistency between order-level transactions and aggregated financial reporting.
- Supported business decision-making layer, enabling improved fulfillment monitoring, revenue tracking, and operational planning through structured BI reporting.

Data Analyst: Biscuit Sales Dashboard

Nairobi, Kenya. | Aug 2025 – Oct 2025

Enabled structured visibility of biscuit sales performance across revenue, cost, profit, customer segments and geographic distribution through integrated analytics using excel.

- **Developed a Power BI sales performance dashboard** integrating revenue, expenses, profit, and quantity metrics for unified financial and operational visibility.
- **Built a multi-dimensional analysis framework**, enabling segmentation across cities, months, payment methods, age groups, and customer behavior.
- **Delivered brand contribution analysis**, identifying top-performing biscuit brands driving a significant share of total revenue and sales volume.
- **Conducted geographic performance analysis**, highlighting city-level variations in sales and identifying high-performing regional markets.

Associate Data Analyst: Sales and Profit Report

Nairobi, Kenya. | April 2025 – Jun 2025

Enabled unified visibility of sales, profit and quantity performance across products, customers and regions through centralized analytics and interactive reporting.

- **Developed an integrated Power BI dashboard** consolidating sales, profit, and quantity metrics into a single reporting interface for unified business visibility.
- **Built a multi-dimensional performance analysis model**, enabling segmentation by category, sub-category, customer, and geography.
- **Delivered top product and customer analysis**, identifying key contributors driving a significant share of overall revenue and profit.
- **Conducted trend analysis**, highlighting yearly growth patterns, seasonal fluctuations, and peak performance periods.

Junior Data Analyst: Sales Volume 2021-2022

Nairobi, Kenya. | April 2024 – July 2024

Driving demand insight, operational visibility, and data-driven decision-making across sales, revenue optimizations, and production functions.

- **Developed a sales volume analytics framework** tracking biscuit demand across time, products, and regions to identify performance patterns and volatility drivers.
- **Built a Power BI trend analysis dashboard**, enabling monthly and weekly visibility into sales fluctuations and demand cycles.
- **Conducted SKU concentration analysis**, identifying top products driving majority of sales and highlighting portfolio dependency risks.
- **Performed regional performance analysis**, uncovering uneven city-level demand and identifying replication opportunities from high-performing markets.
